

ST. CROIX FORGE

FORGING EXCELLENCE

**CONCORDE
EQUI-LIBRIUM**

The proven High

Performance horseshoe

St. Croix Forge Concorde Equi-Librium™:

A technologically advanced shoe for race horses that demand no less than the best.

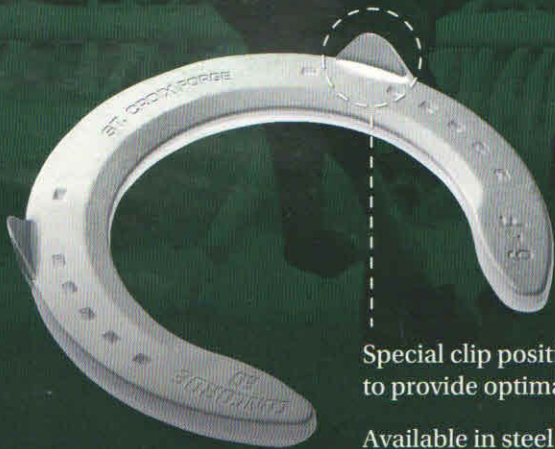

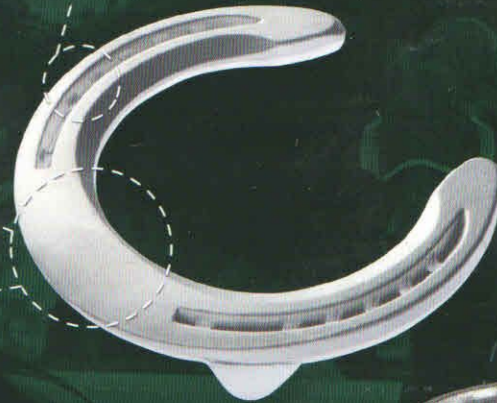

Our Equi-Librium™ design now adapted specifically for race horses.

The science based design of the Concorde Equi-Librium™ has been proven to enhance performance and prevent injuries.

The extra wide toe area is forged with a two dimensional rolled toe, allowing the horse to fluently breakover in any direction required.

The Equi-Librium™ toe design positively influences wear resistance and thus steel toe inserts can be avoided.

V-fullering is unique in race-specific shoes, the V-fullering provides a tight, secure nail fit and together with the inner concave section it provides excellent purchase.

Special clip positioning: side clips placed relatively far forward in the toe to provide optimal support while maintaining a sound hoof mechanism.

Available in steel and aluminum.
